General Note

Only professional high, quality materials & parts are used, immaterial of bow worth.

Please note that it takes just as long (sometimes longer) to work on a cheap factory bow as it does to work on a priceless bow custom built by an Archetier.

Also note the same materials used for a professional's bow will be used on a student's bow.

Note that bows previously worked on by non-professionals may have hidden problems and additional damage caused by use of improper materials and practices, thereby increasing the cost of professional restoration/repair/rehair
